

# TRADELENS OVERVIEW

20.11. 2019

Christian Minarovits  
Client Technical Advisor, IBM  
[christian.minarovits@at.ibm.com](mailto:christian.minarovits@at.ibm.com)

More than  
**\$16 trillion in goods**  
are shipped across international  
borders each year

**80% of the goods**  
consumers use daily are carried by the  
ocean shipping industry

By reducing barriers within the international supply  
chain, global trade could  
**increase by nearly 15%**  
boosting economies and creating jobs<sup>1</sup>

# THE CHALLENGE

Global trade is burdened with inefficiencies and costly processes

Data is trapped in organizational silos >

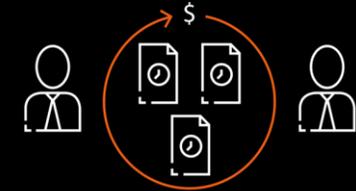

Processes are time-consuming >

Clearance is subject to delays >

Operations are complex and costly >

Critical shipping data is held on various paper and digital systems. Inconsistencies, delays and blind spots lead to poor decision-making.

Manual follow-ups result in inconsistent exception handling and audit procedures. High compliance costs often follow.

Customs clearance involves high levels of risk assessment to prevent fraud and forgery, which often leads to shipment delay.

Restricted ability to forecast, plan and share verified information leads to operational challenges and poor customer service.

# A few examples from our pilot illustrate these inefficiencies

A single shipment of avocados from Mombasa to Rotterdam **involves 30 actors, 100+ people, and 200 information exchanges**

- Inconsistent information across organizational boundaries and blind spots throughout the supply chain hinder the efficient flow of goods
- Complex, cumbersome, and costly peer-to-peer messaging
- Manual, time-consuming, paper-based processes
- Risk assessments often lack sufficient information; clearance processes subject to fraud

Pilot shipments from Central Europe to the U.S. resulted in containers being **delayed for 4 weeks** due to lack of transparency and delayed information exchange

- Missing customs documents prevented gate-in at time of arrival
- Pre-announcement to Terminal was not updated in time. Containers arrived on different mode, causing complications for receipt
- Late filing due to miscommunication between exporter and Customs over documentary requirements.
- Containers missed the vessel due to late gate-in, visibility issues and communications delays; as a result the containers were rolled
- Limited visibility over transport plan issues meant inland providers were unable to carry cargo on the expected date

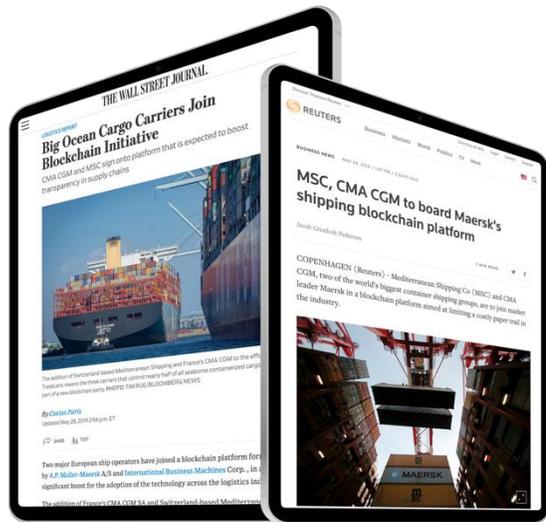

A customer support agent for a freight forwarder may have to **make up to five calls to different parties** to answer a simple location question

- To track a ship or container for the BCO, the Customer Support Agent from the Freight Forwarder may have to call the:
  - Port
  - Carrier
  - Trucking operator
  - Rail operator
- This scenario occurs throughout the supply chain

## KEY TAKEAWAYS

- + Data are siloed
- + Business processes are manual and intensive
- + Supply chain partners spend too much time chasing information

# OUR JOURNEY

**January 2018**

Beta release of the platform and launch of Early Adopter Program; trials underway

**August 2018**

Formal launch of TradeLens

**Ocean carrier additions:**  
Maersk Line, Safmarine, Hamburg Sud, Sealand join

**Ocean carrier additions:**  
PIL, Namsung and Boluda join

**September 2018**

TradeLens limited-availability release

**Ocean carrier additions:**  
Seaboard Marine and KMTTC join

**Ocean carrier additions:**  
ZIM joins

**Ocean carrier additions:**  
CMA and MSC join

**December 2018**

TradeLens commercial release; 1.5 million events per day published to the platform; working with more than 100 ecosystem members

**June 2019**

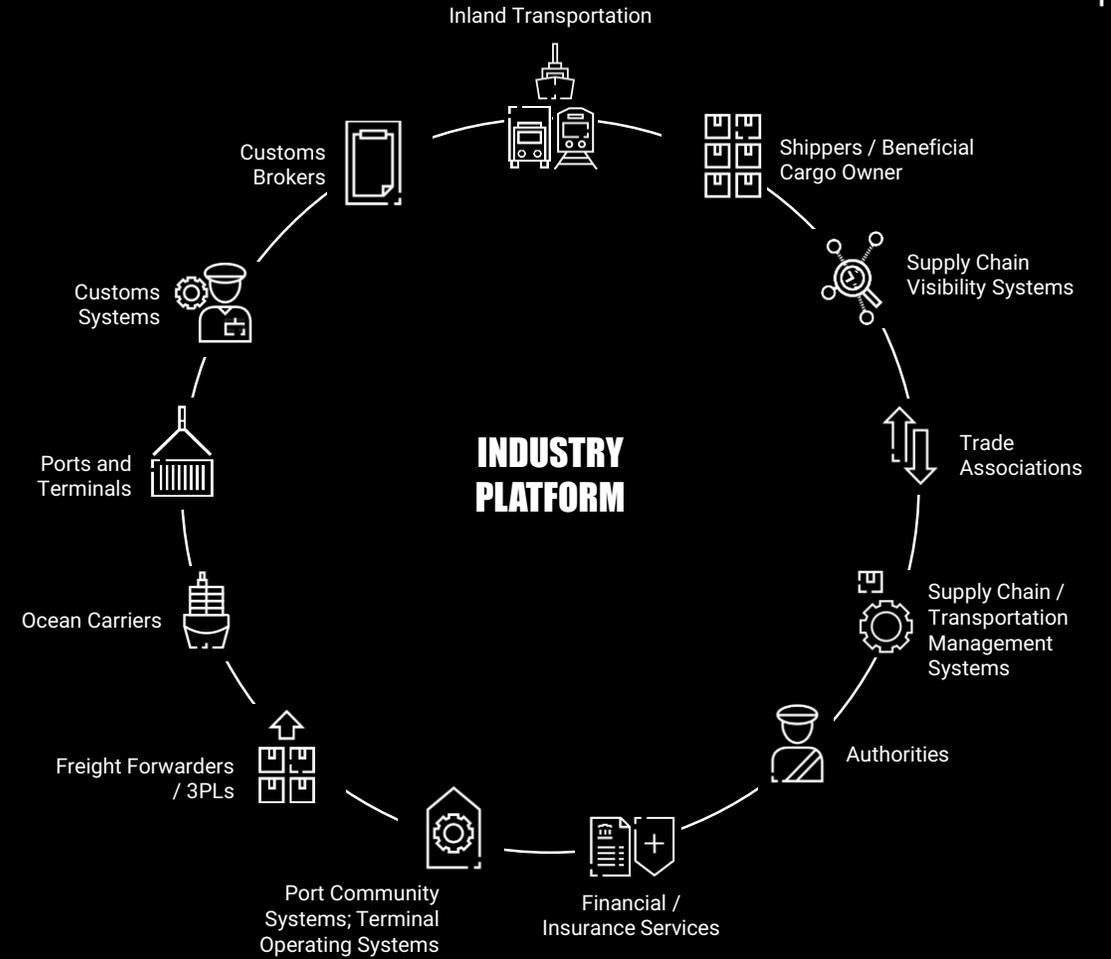

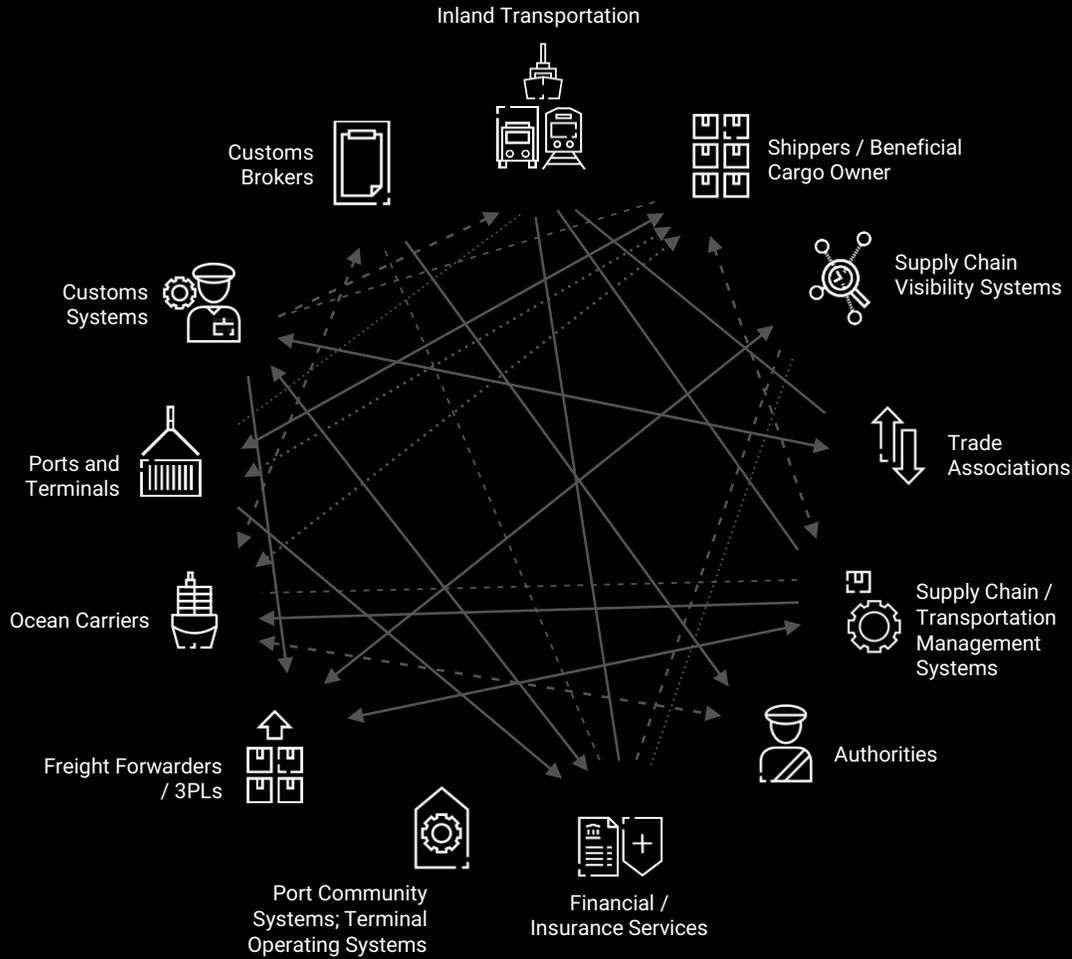

Hapag Lloyd and ONE agree to join. Five of the largest six carriers now plan to be on the TradeLens platform by the end of 2019.

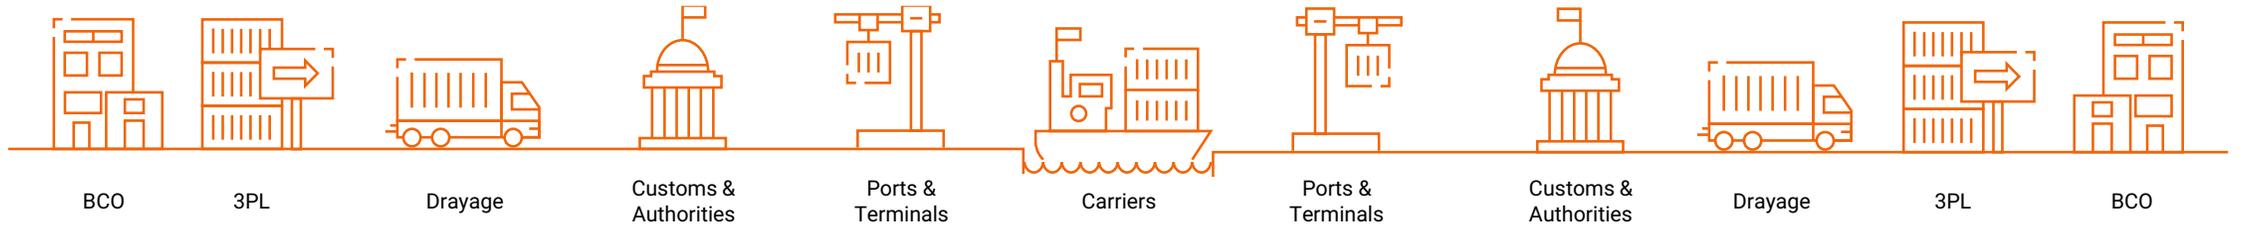

[Read more](#)

**August 2019**

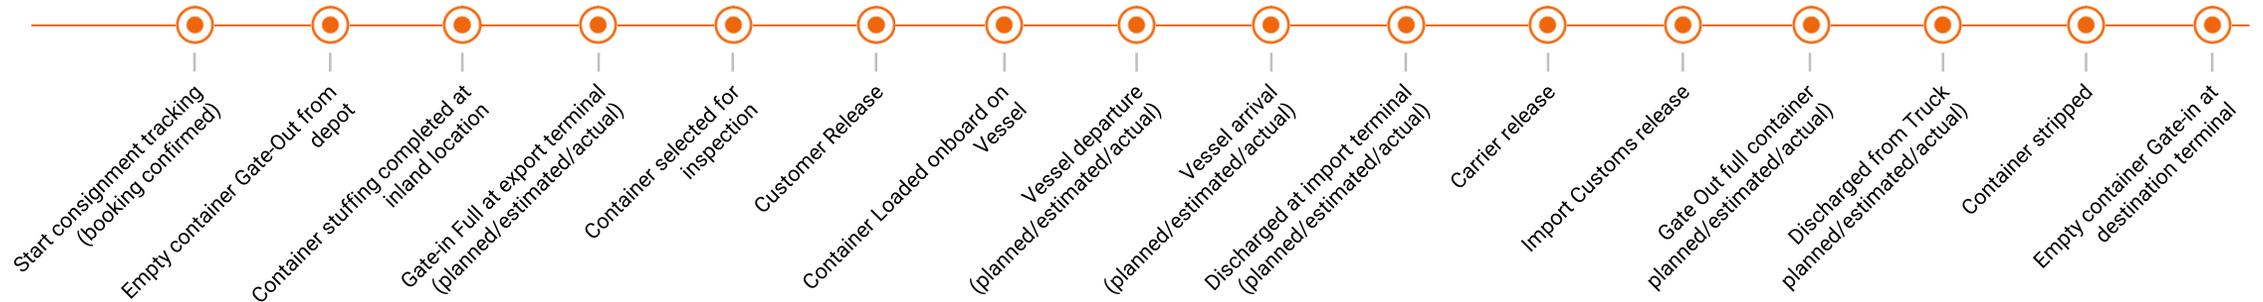

TradeLens processing 2 million events per day and 100 thousand documents per week; supporting more than 150 ecosystem members

# OUR MISSION

SHIPPING MILESTONES AND SHIPMENT DATA\*

STRUCTURED AND UNSTRUCTURED DOCUMENTS\*

TRADELENS BLOCKCHAIN BUSINESS NETWORK

\* Note: representative sample only of the data on the platform

## TradeLens Core

# MILESTONES

Data that are precise and accessible to all parties help shipments move faster. TradeLens provides a near real-time publish and subscribe mechanism for exchanging milestone data between the entities that are involved in the shipment.

Importers and exporters who use TradeLens can easily determine the status of their shipments through access to more than 120 shipment event types, communicated directly from the source, including document updates and planned, estimated and actual transport milestones.

## Planned

---

- + Planned stuffing start
- + Planned stuffing completed
- + Planned loaded on truck
- + Planned gate out
- + Planned gate in
- + Planned discharge from truck
- + More...

## Estimated

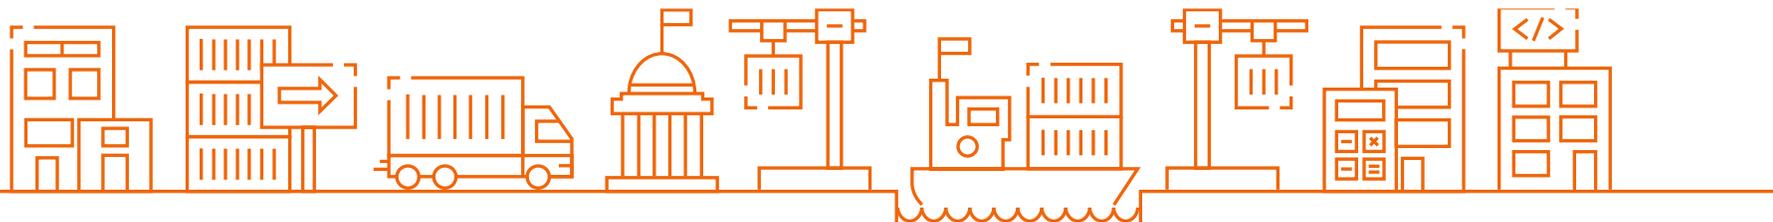

---

- + Estimated rail arrival
- + Estimated discharge from rail
- + Estimated loaded on barge
- + Estimated barge departure
- + Estimated barge arrival
- + Estimated discharge from barge
- + More...

## Actual

---

- + Actual loaded on vessel
- + Actual vessel departure
- + Actual vessel arrival
- + Actual discharge from vessel
- + Actual stripping start
- + Actual container stripped
- + More...

## TradeLens Core

# DOCUMENT SHARING

TradeLens provides a framework for sharing documents among trade parties, with security, version control, and privacy. Authorized users with the required permissions can upload, download, view and edit documents. The TradeLens document store allows documents to be securely stored and viewed by various parties to a shipment.

## Digitized document benefits

- + Trade documents are associated with containers, and consignments in a distributed and shared repository, eliminating endless file, folder and email searching for information.
- + TradeLens supports the use of structured documents. The information they contain can be easily analyzed and interpreted, allowing for greater automation and accuracy.
- + Each time a document is edited or uploaded to the TradeLens platform, a new version of the document is created and added to the document store, eliminating multiple copies and the inconsistency of identifying the latest versions.
- + TradeLens uses the Hyperledger Fabric permissioned blockchain to guarantee the immutability and traceability of trade documents.
- + Participants assigned to the consignment have default access rights based on a unified permissions model
- + Network participants assigned to a consignment can immediately access shared documents and data, never having to wait for a document to be sent.

## DOCUMENTS SUPPORTED ON THE PLATFORM

- + Sea Waybill\*
- + Commercial Invoice \*
- + Packing List \*
- + Booking Request
- + Booking Confirmation

- + Health Certificate
- + Phytosanitary Certificate
- + Veterinary Certificate
- + Fumigation Certificate
- + Inspection Certificate
- + Certificate of Analysis
- + Certificate of Origin
- + Dangerous Goods Declaration

\* Structured support

# ECOSYSTEM PARTICIPANTS

## NETWORK MEMBERS

### Ocean Carriers

Provide the transportation plan, information about the status of shipments across the ocean leg, and critical documents such as the BoL; access end-to-end supply chain data in near real-time including events directly from shipper, intermodal, customs and 3PLs

### Ports / Terminal Operators

Provide information about the disposition of cargo within the boundaries of the port/terminal; access near real-time information to enrich port collaboration and improve terminal planning

### Intermodal Operators

Provide transportation plans and information on the disposition of shipments carried on trucks, rail, barges, etc.; improve planning and utilization of assets given near real-time access to end-to-end supply chain events for shipments

### Government Authorities

Provide information about the export and import clearance status for shipments into and out of the country; access end-to-end supply chain information for improved customs clearance and risk assessments

## TRADELENS CLIENTS

### Shippers/BCOs

Engage with the platform as a consumer of shipping information to improve supply chain management, as a means to collaborate with supply chain partners, and as a way to streamline clearance

### Freight Forwarders / 3PLs

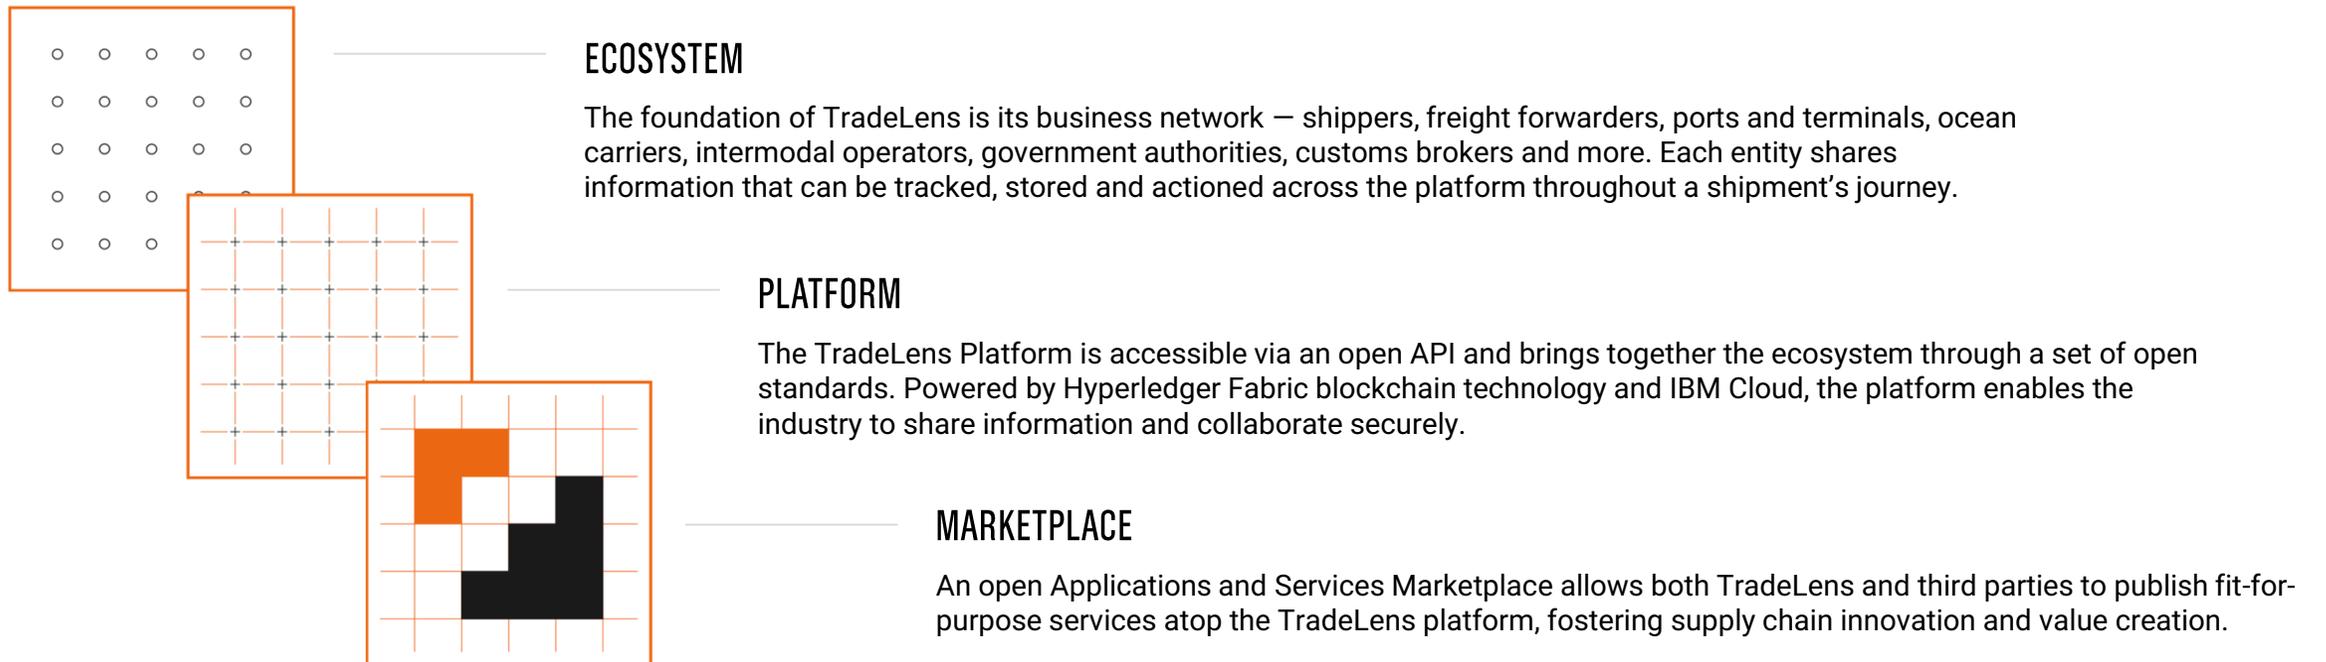

Engage with the platform as a consumer of shipping information, a means to collaborate with customers and supply chain partners, and a way to improve customs brokerage capabilities

### Financial Services

Engage with the platform as a consumer of supply chain information for a variety of trade finance, insurance, and other purposes to reduce the risk of fraud and increase speed and flexibility to customers

# THE TRADELENS SOLUTION

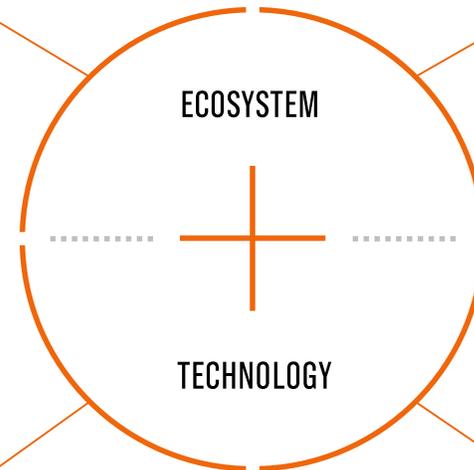

# THE TRADELENS COLLABORATION

## Network Members

Network Members provide and gain access to end-to-end supply chain information. Network Members include ocean carriers, ports and terminals, customs and government authorities, intermodal operators, data providers and other logistics providers.

## IBM and Maersk GTD

IBM and Maersk GTD\* are developing, operating, and supporting the platform under a joint collaboration; the TradeLens Advisory Board will help shape the platform and establish open standards.

## TradeLens Clients

TradeLens Clients are the primary consumers and beneficiaries of the platform. TradeLens Clients include shippers/BCOs such as manufacturers and retailers, as well as 3PLs, financial institutions, and others.

## Development Partners

Development Partners offer value added services to the ecosystem through an application portfolio. The portfolio consists of TradeLens offerings, offerings from Network Members and Clients, and offerings from third parties.

\* Maersk GTD is the subsidiary of A. P. Moller Maersk responsible for TradeLens

# THE TRADELENS ECOSYSTEM

## Ports & Terminals

- Ports and terminals directly integrated with TradeLens
- Ports and terminals contributing data via carriers to TradeLens
- + Coverage across 6 continents
- + 70 ports and terminals directly integrated with TradeLens
- + Data from up to 600 ports and terminals captured by existing TradeLens members

## Governments

## 3PL AND INTERMODAL

# OCEAN CARRIERS

The ocean leg is at the heart of a container shipment journey, and as such carriers are the linchpin of the end-to-end information model by providing the booking that links all parts of the journey.

Given the central role that carriers play today in safeguarding and distributing key information and documents across parties to a shipment, they are in a unique position to govern the blockchain network that will transform the industry's information-sharing model.

TradeLens is currently in partnership with 17 global ocean carriers\*.

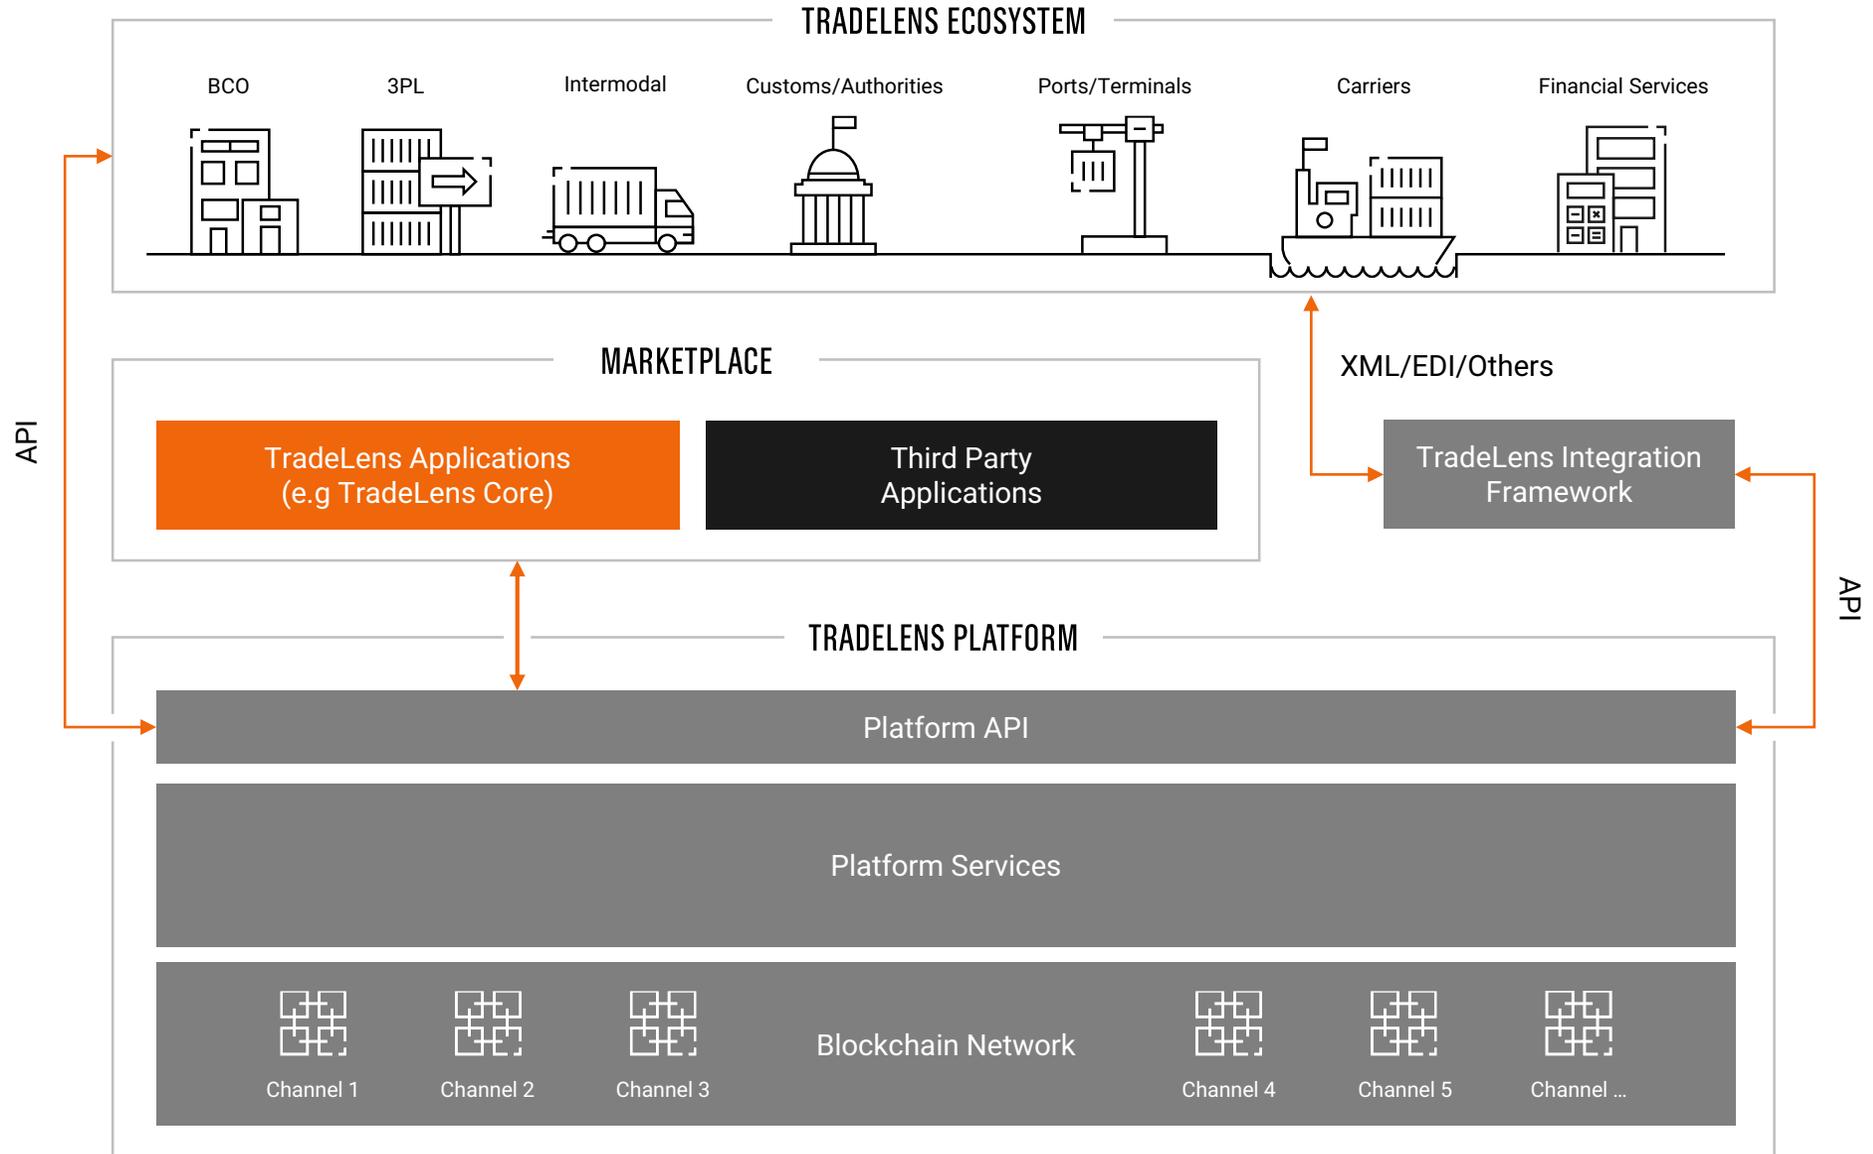

DATA ON 60% OF  
GLOBAL CONTAINER  
SHIPPING VOLUME

ESTIMATE BY Q1 2020

\* CMA CGM, MSC, Hapag-Lloyd and ONE have agreed to join TradeLens; final on-boarding pending. Speak with your TradeLens representative for a report on current onboarding status.

# SOLUTION ARCHITECTURE

# FLEXIBLE

TradeLens has been developed to be adaptable and simple to use.

## APIs

TradeLens is committed to openness, the platform can be accessed using standard, non-proprietary and publicly available APIs that are designed specifically for ease of integration.

## WEB

The platform can also be accessed via the web without integration. Users can engage with essential platform features including the search and track functions and document access through a secure SSO web app.

TradeLens Core

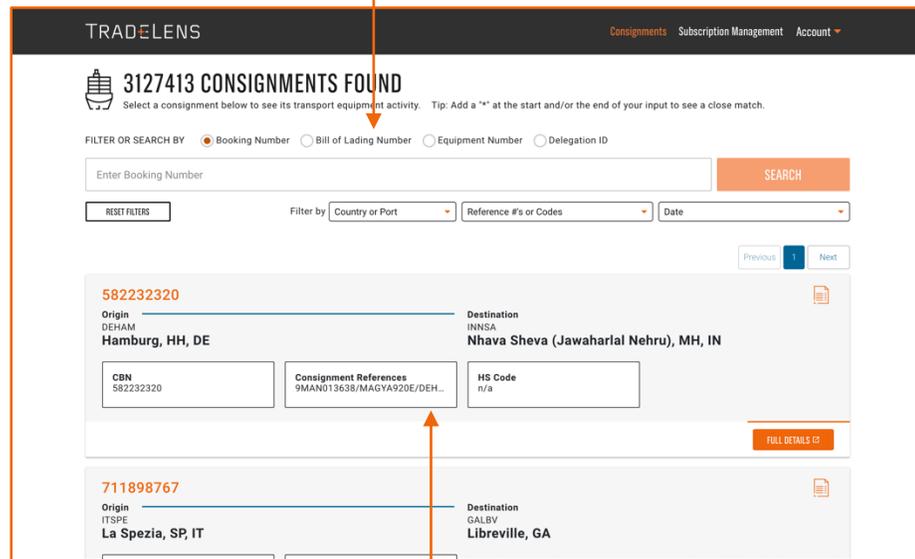

# SHIPMENT MANAGER UI

TradeLens can be accessed via the web without integration. Users can engage with essential platform features including the search and track functions and document access through a secure SSO web app.

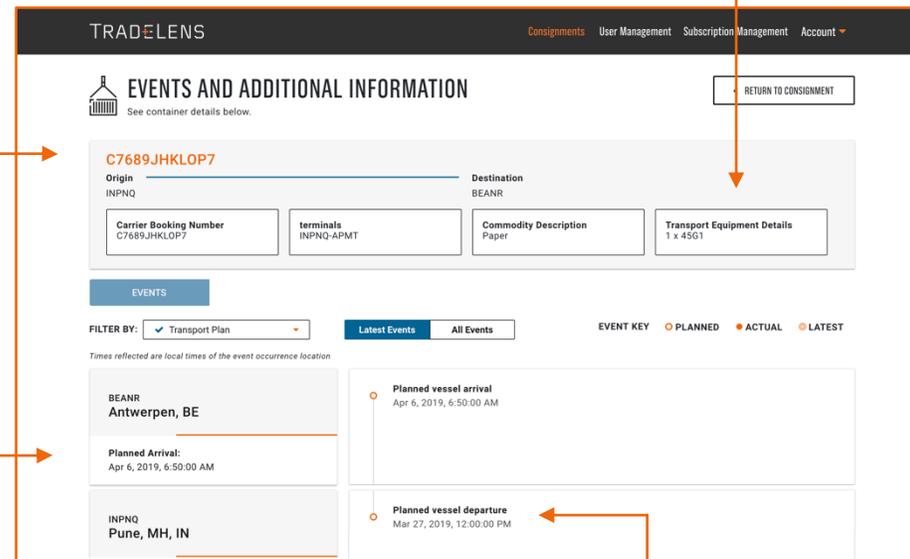

Consignments can be identified by booking, equipment, bill of lading and client reference numbers.

View shipping events, documents and transportation plan.

Events are sourced directly from carriers, ports, terminals and other parties to the shipment.

A single, secure, simplified view across all shipments in the supply chain

120 plus standardized events published from the source.

Near real-time events directly from the source are instantly visible to all parties to a consignment.

# FUTURE OF THE MARKETPLACE

## 1 – 2 YEAR OUTLOOK (SUBJECT TO CHANGE)

### + TradeLens Core (released December 2018)

Releasing smart notification built with business logic to bolster agile supply chains.

### + Shipping Instruction Automation

Simplify the complexity and iteration between shipper and provider in the sending of instructions and creation of a complying bill of lading.

### + Negotiable Electronic Bill of Lading

A digital asset providing secure paperless transfer of ownership and cargo release.

### + Freight Booking

Seamlessly book freight with TradeLens member carriers.

### + Trade Finance

Digital alternatives to traditional letters of credit, leveraging TradeLens milestone, document, and e-Bill capabilities.

### + Cargo Insurance

Purchase highly competitive cargo insurance from leading firms, enabled by TradeLens data.

### + Cross-mode Dangerous Goods

Simplified, consistent, and auditable means to share dangerous goods documentation across all modes of transport

### + Additional Developments

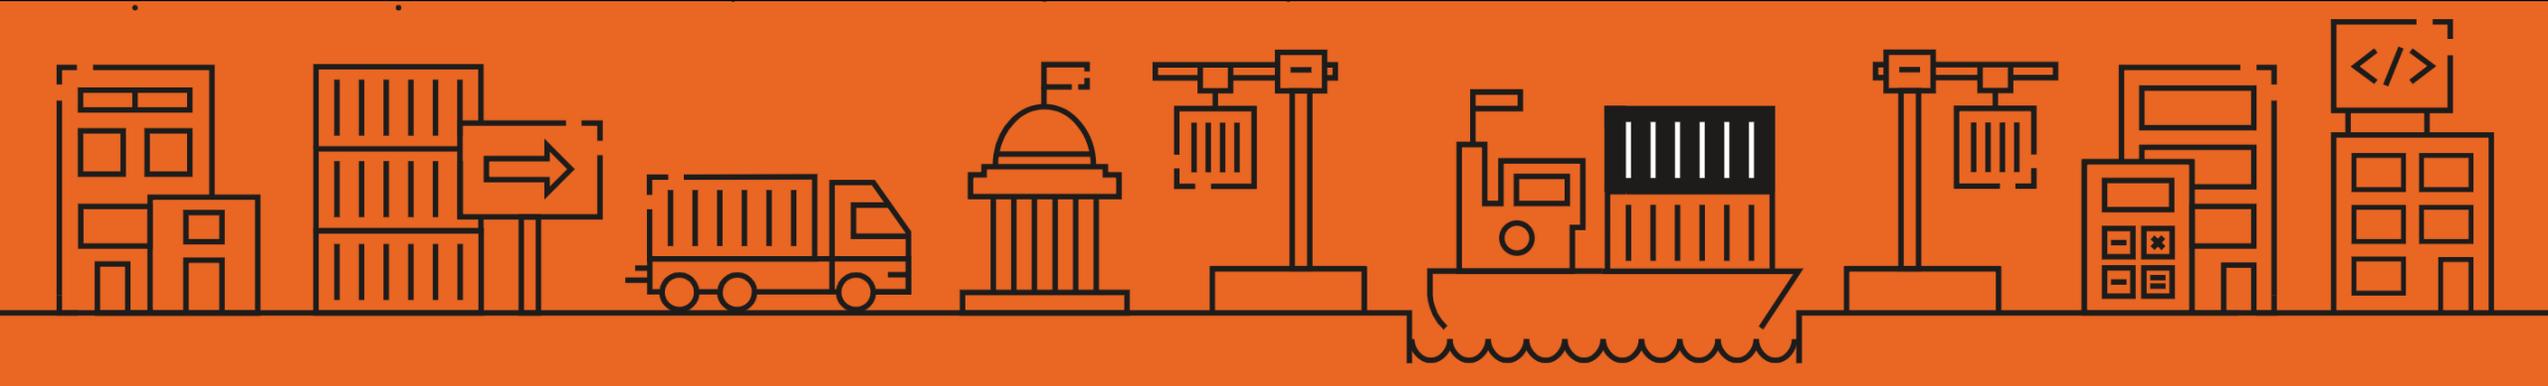

Advance Ship Notification (ASN) automation, AI logistics insights, interoperability with leading blockchain solutions, and more.

### + The TradeLens Marketplace

Supporting a partner program on TradeLens.com in Q4 2019.

# PARADIGM SHIFTING MODEL

- Shipping milestones, trade documents, cargo details, IoT readings, and more
- Seamless, permissioned, role-based access
- Industry standards - UN-CEFACT
- Full transparency across the supply chain

# Thank You!
