Location analysis

In fast-moving times with changing trends and strong competition, young entrepreneurs and start-up founders are constantly confronted with questions such as: "Where is my target group? Where will I have the best opportunities with my business idea?" Our location analyses give you the answers to these questions.

Which location is suitable for your company primarily depends on the industry and operating environment. The location analysis provides you with the facts, figures and data you need to form an idea about the socio-demographics of the local population, purchasing power, industry mix, competitors, footfall and infrastructure. It enables new and existing companies to ensure that the business idea and location are a good fit. Request your free location analysis - by phone, email, at freielokale.at or by using the registration form in this folder.

Advice and support with the location search

Whether you're looking for suitable business premises or need information about specific locations - we are here for you. In a personal meeting, we'll look at your business idea, make a note of your search criteria and help you search for the right premises.

search agent

The search agent is a service for registered users on freielokale.at. If a new business premises that matches your search criteria is added to the database, the search agent will automatically inform you by email. So you're always up to date!

Marketing support for start-ups

Have you found vacant business premises? As a form of marketing support, we can introduce your company in various media of the Vienna Chamber of Commerce and Industry. To make use of this offer, please send us a brief text about your company (approx. 800 characters including spaces) as well as one or more photos of your business premises to **freielokale@wkw.at**.
